# Adam Speer

## Full Stack Web Developer

Ambitious full-stack web developer with 7+ years of experience in building scalable web solutions for diverse business models. Skilled in both front-end and back-end development, with expertise in modern JavaScript frameworks, cloud services, and custom API integrations. Adept at using AI tools, including GPT, Claude, Cursor AI, among others, to streamline workflows, speed up code development, and boost productivity. Strong communicator and problem-solver with a record of leading development teams and delivering high-quality, user-focused software.

## Experience

### ○ April 2023 - Present

Apex Systems, Eli Lilly and Co. - Indianapolis, IN

#### Full Stack Engineer & Digital Design Lead (contract)

- Spearheaded the redesign and migration of the Mounjaro US website from Nuxt.js to Next.js, enhancing performance and maintainability.
- Developed and maintained full-stack applications using Vue.js, React.js, Node.js, and Koa.js, with a focus on scalable, secure, and efficient code.
- Created custom APIs to support personalized web content for specific target audiences, driving engagement through tailored experiences.
- Leveraged AI tools such as GPT and Claude to accelerate coding and problem-solving tasks, reducing development time by over 20%.
- Collaborated with brand and marketing teams and other engineers, fostering clear communication and alignment on project goals.

### ○ Aug 2021 - Jan 2023

Salesforce - Indianapolis, IN

#### Associate Software Engineer

- Built applications for Salesforce.org and the Salesforce platform, integrating with various third-party APIs.
- Participated in and led product and feature design meetings and code reviews.
- Automated accessibility testing across Salesforce web products, improving usability company-wide.
- Scrum Master for Software Engineering team leading meetings with different stakeholder and provided deliverables to different team leads.

### ○ June 2019 - July 2021

JDR Web Solutions - Indianapolis, IN

#### Full Stack Web Developer

- Developed front-end and back-end components of websites using PHP, WordPress, and JavaScript.
- Created custom security scripts and ensured cross-browser compatibility.
- Managed critical project handovers and introduced task management improvements to boost productivity.

### ○ Jan 2018 - June 2019

Prosper Group, LLC - Indianapolis, IN

#### Web Developer

- Developed responsive political and corporate websites using WordPress, CSS, Sass, and JavaScript, ensuring cross-browser compatibility and optimized performance.
- Collaborated with designers to translate PSD mockups into pixel-perfect web designs, delivering high-quality, client-focused solutions on tight deadlines.
